

Mail and Messaging Solutions

Your “Bullet-Proof” Solution

Companies of all sizes need a “bullet proof” communications infrastructure. That’s why Collective provides turnkey Mail and Messaging Solutions based on Microsoft Exchange Server 2003, the industry’s leading communications platform. Our solutions enable organizations to cost effectively upgrade their current mail and messaging infrastructure with minimal disruptions to the business. These solutions also ensure that an organization’s mail and messaging infrastructure is optimized to fully support unique business, operational and organizational requirements.

More specifically, we can:

- Help companies carry out business anytime, anywhere with Collective’s Mobile Workforce Solution for Microsoft Exchange.
- Help companies proactively manage email growth with Collective’s Mailbox Booster Solution for Microsoft Exchange. This allows companies to keep their system up and running, even with the number of mailboxes growing rapidly and new users coming online every day. This can also mitigate risks associated with the legal discovery process.

Best-of-Breed Technology

Exchange Server 2003 is the latest version of Microsoft’s industry-leading communications server, providing a range of powerful new features and

enhancements to ensure reliability, manageability, and security. Exchange Server 2003 helps IT to deliver the service levels and capabilities demanded by end users while helping organizations to reduce their Total Cost of Ownership (TCO) through areas such as server and site consolidation. Exchange Server 2003 supports mobile devices and enables users to easily synchronize their Inbox, Calendar, and Contacts and Tasks lists so they can remotely check their appointments and other important information.

Flexible Collaboration

The Exchange Server collaboration features help users to share information quickly and efficiently. Typical collaborative scenarios include:

- Maintaining shared address lists that everyone can view and edit.

- Scheduling meetings by viewing schedules for attendees and available conference rooms.
- Allowing users to grant other people, such as administrators, access to their mailboxes.
- Managing rules for processing messages on Exchange Server, giving users the flexibility to create auto-responses and automatic filing of incoming messages.

Mail and Messaging Solutions

Your “Bullet-Proof” Solution

The Benefits With Collective and Microsoft

A Collective Mail and Messaging Solution delivers critical benefits at two levels.

With Collective services, you'll benefit from —

- Our deep expertise with Microsoft implementations as a certified Microsoft Gold Partner and Microsoft National Systems Integrator.
- Our turn-key solutions addressing the full range of your communications needs, including Mobile Workforce Support and Mailbox Booster.
- The efficiencies of using a single vendor responsible for all project details.
- Smooth, cost-effective deployments based on formalized methodologies and Best Practices gained from extensive engagements.
- Collective Intellect, Experience and Service that goes into every project we undertake.

With Collective and Exchange Server, you'll receive —

- Expanded, enterprisewide communication with mobile, remote, and desktop e-mail access.
- Enhanced user collaboration with a flexible yet highly integrated e-mail solution.
- Increased mobility with built-in mobile features to help drive greater worker productivity by facilitating mobile and remote computing scenarios.
- High reliability with multi-node cluster support, mailbox recovery, and Outlook synchronization performance.
- State-of-the-art security and privacy based on features such as restricted distribution lists, virus scans, user authentications, and baseline security analysis.

Talk to the Infrastructure Experts

In addition to our Infrastructure Services, Collective provides Infrastructure Solutions with Mail and Messaging, Data Center Relocation Solutions, and Staffing Solutions. Learn more about the many ways that Collective can help you optimize your infrastructure and realize the full promise of today's technology.
