

Mailbox Booster for Microsoft Exchange™

Improving Your Mailbox Management

To help companies optimize the use of storage and reduce the cost of legal discovery, Collective provides Mailbox Booster for Microsoft Exchange. This proven, cost-effective solution includes EMC EmailXtender and EmailXtender Archive Edition. It fully supports migration from Microsoft Exchange Server 5.5 or Microsoft Exchange Server 2000 to Exchange Server 2003. A Collective solution also includes a Mailbox Booster assessment to determine requirements for mailbox and storage optimization, back-up/restore healthcheck, and other infrastructure functions.

The Collective solution can improve your mailbox management by reducing email storage costs and improving email server performance. You can also enjoy a reduction of the costs and risks associated with the legal discovery process by managing and archiving emails and instant messages (IM) as a business record.

Lower Your Storage Costs

With Collective and EMC's EmailXtender, IT can reduce email related storage costs by moving messages and attachments from Exchange Server to a secure archive server. This decreases the burden of Exchange Server and improves performance. EmailXtender eliminates duplicate messages, while retaining a record of all users who sent or were copies on the message. Email tender then compresses the data, further reducing the size of the archive. The result is better Exchange Server performance, less data to back up, less tape usage and a compact messaging archive.

Managing Email as a Business Record to Reduce Risk

Companies without a comprehensive email management system face a greater risk related to electronic discovery. An email-related litigation or discovery request can be costly and time-consuming. EmailXtender's real-time capture provides support for a complete and authentic archive.

Full-text indexing of a subject line, message body and attachments, and powerful search tools ensure that requested emails can be produced in minutes rather than weeks or months. This indexing technology is extremely efficient, producing index data that is 10% the size of the message and attachments.

Talk to the Infrastructure Experts

In addition to our Infrastructure Services and Solutions, Collective provides Data Center Relocation Solutions and Staffing Solutions. Learn more about the many ways that Collective can help you optimize your infrastructure and realize the full promise of today's technology.

The Benefits With Collective

Unbeatable Performance and Value

- Organizations can cost-effectively migrate from Exchange Server 5.5 or 2000 to Exchange Server 2003 with minimal disruptions to the business.
- Mailbox management is improved.
 - Reduced email storage costs
 - Increased operational efficiency
 - Optimal user productivity
- The cost and risk of legal discovery is reduced.
 - Reduced discovery costs
 - Elimination of unmanaged archives
 - The benefit of Collective's relationships with some of the industry's leading brands, ensuring that you get best-of-breed hardware and software solutions tailored for your specific needs.

A Comprehensive Solution

- Turn-key solutions enable rapid upgrading of your Microsoft Exchange 5.5, and 2000 environments.
- Pre-packaged services have been tested and thoroughly proven, helping to streamline and optimize the migration and implementation process.

Prepackaged services include:

- Collective Mailbox Booster for Exchange Readiness Assessment
- Back-up/Restore/Hotsite Healthcheck
- Active Directory Design and Deployment
- EmailXtender Design and Installation
- Microsoft Exchange 2003 Training
- Active Directory Training
- EmailXtender Training

Reduced Risks and Costs of Migration and Deployment

- Our service professionals are experienced and highly skilled, with the industry's highest certifications.
- Collective gives you a single-vendor solution, backed by over 5 million hours of infrastructure services for thousands of satisfied customers worldwide.
- We have extensive relationships with the leading technology vendors in the industry.
- Our solutions are based on best practices and proven methodologies, anticipating possible challenges and recommending effective strategies to avoid them.
- Our solutions are accurately scoped and staffed which helps reduce costs and decrease time to delivery.
